

# THE TURF COMPANY

The Leading Producer of Water Efficient Turf Grass™

## TETON BLUE®

---

A premium blend of the best performing and most recommended Kentucky Blue grass varieties as ranked for color, density and disease resistance. This blend has been recognized as being superior by the golf course industry, park and sports field managers, landscape architects and landscape designers. It is the most requested and, or specified Kentucky Blue Grass Blend we have ever produced.

The Teton Blue® blend is extremely well suited to be placed at high altitude under extreme conditions and it also well suited under the normal growing conditions of the residential subdivision at more moderate elevations.

Teton Blue® is a fitting tribute to the discriminating buyer who has a love for the attributes of the highest quality Kentucky Bluegrass lawn available on the market today and also, to the individual who appreciates the numerous advances that have been made by plant breeders with this popular species of ornamental turf grass.
